Profile

I'm an Informatics undergraduate at Telkom University with a strong interest in Data Engineering, AI, and Automation. I enjoy building end-to-end data pipelines, automating workflows, and solving real-world problems using Python, SQL, and modern data tools.

Technical Skills

Programming	Python, SQL, Java, C++
Database	PostgreSQL, MySQL
Data Engineering	ETL, ELT, Airflow, dbt, Docker
BI & Tools	Power BI, Excel, Google Sheets, Git, GitHub
AI & Automation	API Integration, n8n, Gemini/OpenAI API

Featured Projects

PerpusYUK Library Management System - Library management system concept for organizing books, members, borrowing flows, and administrative records.

AI Automation Workflow - Automation workflow project connecting APIs, structured inputs, and AI services to reduce repetitive manual work.

Education

- SMP Pasundan 1 Bandung - Grade 7
- SMPN 38 Bandung - Grade 8 to 9
- SMAN 18 Bandung
- Telkom University - Informatics Undergraduate

Learning Journey

- 2025: Python, API, and Automation Fundamentals
- 2026: Data Engineering Roadmap
- Current: Building hire-ready portfolio projects
- Next: Data Engineer Internship / Junior Data Engineer
